Judge simulator run, 2026-10-31T13:56:37+05:30

Target: https://scammap-huii.onrender.com
Held-out seeds: [9101, 9102, 9103, 9104, 9105, 9106, 9107, 9108, 9109, 9110]
Elapsed: 1599s

Row 1: Stops fake reports (20): PASS

check	passed	PRD clause
junk reports rejected 400	90/90	A2: 400 when identifier, area code or time is not valid
trick never KNOWN_SCAM: friends	50/50	Row 1: none of these makes a number Known scam
trick never KNOWN_SCAM: sybil	30/30	Row 1: none of these makes a number Known scam
trick never KNOWN_SCAM: spam	20/20	Row 1: none of these makes a number Known scam
one person N times counts as 1	20/20	A3: One person reporting six times is 1

Row 2: Lookup gives the right answer (15): FAIL

check	passed	PRD clause
valid reports accepted	6612/6612	A2: 201 with report_id, case_id, merged (429 allowed)
lookup returns 200 for valid values	860/860	A3
reply shape and verdict enum	860/860	A3: fields and verdict is exactly one of four

check	passed	PRD clause
real scam is KNOWN_SCAM (k3-4)	50/53	Row 2: real scams come back Known scam
every format gives the same answer	3250/3250	A rule 3: one identifier, many ways of typing it
real scam is KNOWN_SCAM (k5-9)	67/69	Row 2: real scams come back Known scam
real scam is KNOWN_SCAM (k10+)	76/78	Row 2: real scams come back Known scam
1-2 reporters is SUSPICIOUS	160/160	A3: reported but not established
unreported is NO_REPORTS	200/200	A3: nobody reported is 200 with NO_REPORTS
brief's format examples match	50/50	A rule 3 examples
impossible values are 400	130/130	A3: a value that cannot be valid, like 12345, is 400

Row 3: Map and alerts (10): PASS

check	passed	PRD clause
map lists exactly the areas in radius with reports	500/500	A4: one cluster per area within the radius that has reports in the window
cluster fields and severity	1329/1329	A4: count, top_scam_type, severity CRIT/HIGH/MED
month-old reports not on the map	10/10	Row 3: month-old reports are not on the map
days parameter widens the window	10/10	A4: days parameter
spike area gets SPIKE	10/10	A5: last 24h >= 2x the daily average of the 7 days before, and >= 5

check	passed	PRD clause
normal area gets no SPIKE	10/10	Row 3: a normal area does not
new scam type gets NEW_TYPE	10/10	A5: type in last 24h not seen in the 30 days before
quiet area replies {alerts: []}	10/10	A5: No alerts means {"alerts": []}

Row 4: Privacy (15): FAIL

check	passed	PRD clause
evidence never shows reporter, IP or note	860/860	A3: evidence never includes who reported, their IP or their note
no accusing words in lookup reply	860/860	Row 4: careful wording
3+ real reporters: counted as 3+	198/200	A3: distinct_reporters counts different people
under 3 reporters: value hidden	445/445	A3: hide it until at least 3 different people
map uses only Appendix B points	1329/1329	A4: use the area's map point, never a reporter's location
no reporter id, IP prefix or note in any reply	11421/11421	Disqualification: a reporter can be identified

Row 5: Server and licence (15, automatable part): PASS

check	passed	PRD clause
health	1/1	A1: 200 with {"ok": true}
licence valid on this server	1/1	Ship it: GET /license
served over https	1/1	Row 5: on an https address

check	passed	PRD clause
reset works	10/10	A6: Delete every report and reply 200

Row B: Bonus (7): PASS

check	passed	PRD clause
challenge accepted	10/10	A7: 201 with challenge_id, status under_review
verified entries say VERIFIED_BUSINESS	190/190	C: must say VERIFIED_BUSINESS, never a scam
challenged: flag set and never KNOWN	10/10	A7: challenged true, never KNOWN_SCAM
fake reports never set off an alert	40/40	Bonus: fake reports never set off an alert

Lookup latency: FAIL

4210 lookups: p50 130 ms, p95 291 ms, p99 500 ms, max 1202 ms, mean 151 ms (bar: under 500 ms)
